

## home use test results:

### participants report high satisfaction

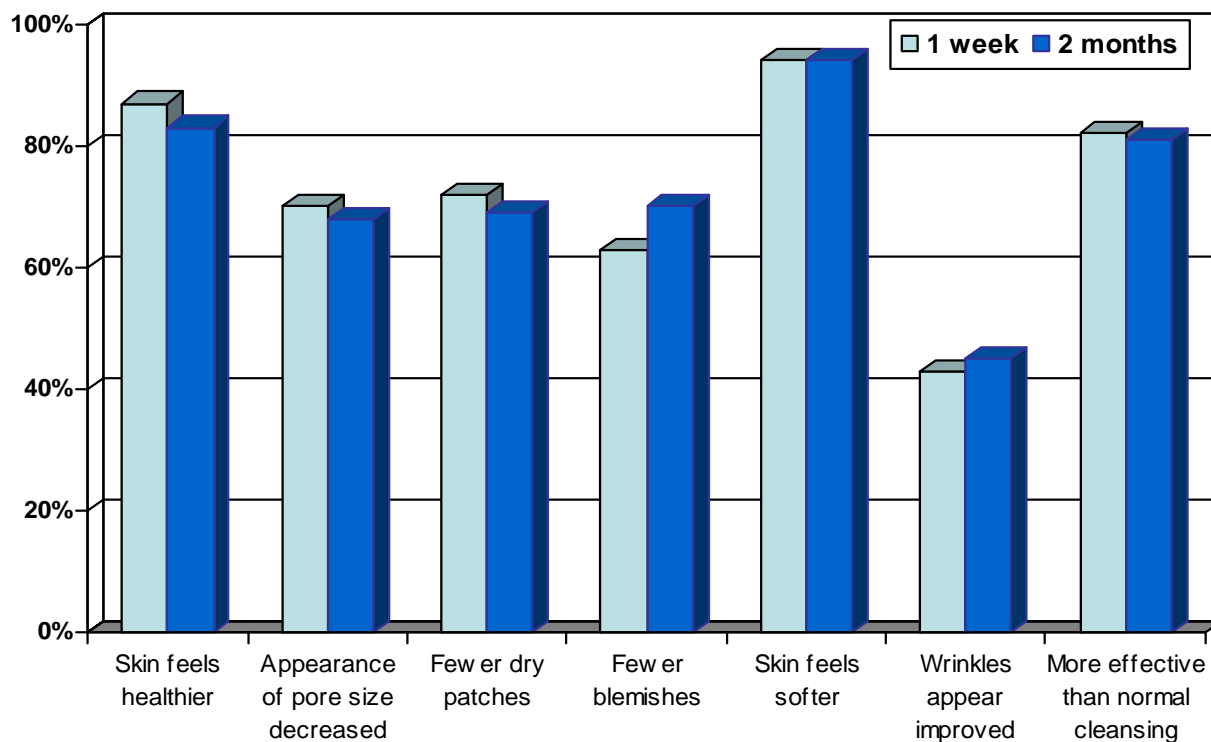

One hundred and nine participants took part in an 8-week Home Use Test evaluating the CLARISONIC® Skin Care Brush. Participants were instructed to cleanse their face for 1 minute twice per day using the CLARISONIC with the CLARISONIC Daily Cleanser. *At the end of 8 weeks, 83% of participants reported that their skin appeared healthier.*

Participants also perceived a deep cleansing to unclog pores as well as maintain pores from

becoming clogged. They reported the CLARISONIC was more effective than their normal method of cleansing, resulting in a perceived reduction in the appearance of pore size, blemishes, wrinkles and dry patches.

Experience the CLARISONIC for yourself. Just 1 minute, twice a day, for great results. Call 1-888-5-CLARISONIC (1-888-525-2747) or visit [clarisonic.com](http://clarisonic.com) to get started.
